

An unobtrusively elegant and yet powerful system for installations and corporate presentations. The revised 2 x 6.5'' / 1'' configuration with larger horn provides improved coverage and speech intelligibility and longer throw. Four M10 mounting points, combined with our range of mounting accessories, allow fast and simple horizontal or vertical installation. The option is available for a fifth M10 mounting point in place of the standard loudspeaker stand socket. The integrated digital amplifier technology provides 500 / 150 Watt AES and DSP control. A range of factory-configured presets and volume settings can be selected.

#### Presets

#### Flat

This setting provides a linear frequency response with a neutral sound characteristics. Standard setting for many applications.

#### HP

Switches in a high pass filter for use in combination with a subwoofer.

#### Boost

The same neutral response as the "Flat"setting, but with the addition of a bass boost.

#### Soft

Reduces the level in the frequency range from 2.5 - 5 kHz, to which the ear is particularly sensitive. This setting is recommended for high level reproduction of highly compressed music tracks.

## Mode - key

Switches between control modes Status, Level and Presets.

#### Set - key

Setting of various values and Mute on / off.
