

The construction principle of the high powered K 20 mid-high cabinet allows for flexibility of use in horizontal or vertical orientations. Optimised placement of the 2 x 10" / 1.4" drivers in relation to one another ensures a very precise phase and coverage characteristic. For installation applications, the universal MultiRigg™ be used to mount the system. The K 20 is available in a self-powered version, and in a version with a passive crossover. 2 different horn forms are available to better cover various Sound Reinforcement situations.

The K 20 dp features integrated digital amplifier electronics with a DSP controller. Various factoryconfigured presets and volume settings can be selected. High-grade electronic components from the industrial sector and a first-class circuit design ensure excellent audio quality with low distortion and a minimal noise floor.

Highly efficient and "intelligent" limiter systems ensure optimum protection against overload, without restricting the possibilities offered by this high-performance sound system.

#### Presets

#### Flat

This setting provides a linear frequency response with a neutral sound characteristics. Standard setting for many applications.

#### High Boost

For use on long distances.

#### Boost

Similar to the "Flat" preset, but with increased low end response.

#### Soft

Reduces the level in the frequency range from 2.5 - 5 kHz, to which the ear is particularly sensitive. This setting is recommended for high level reproduction of highly compressed music tracks.

#### Mode - key

Switches between control modes Status, Level and Presets.

#### Set - key

Setting of various values and Mute on / off.
